

THE TRUSTED
SCIENCE.
NOW
FRAGRANCE-FREE.

MIADERM® FRAGRANCE-FREE. BRINGING RADIATION DERMATITIS RELIEF AND PROTECTION TO ALL.

Developed by radiation oncologists, Miaderm was formulated specifically to help you avoid or minimize the most common side effect of radiation treatment: radiation dermatitis.

Using ingredients supported by science, Miaderm has helped many thousands across the U.S. and the world protect their skin from damage, soothe its discomfort, and—most importantly—avoid interruptions in treatment.

Yet, a small percentage of the population has a higher sensitivity to fragrances, so they often avoid using lotions that contain them. Because our family's mission and culture revolve around our customers' needs, we've added Miaderm Fragrance-Free Radiation Relief lotion to our family of products.

Along with our original formula and Miaderm-L with Lidocaine, Miaderm Fragrance-Free means protection and relief from skin damage are now available to people challenged by fragrance sensitivity.

- Designed for individuals with sensitivity to perfumes or fragrances
- Recommended for people with chemical sensitivities
- Ideal for patients who've had prior reactions to dermatitis relief lotions
